NATURAL WOOD PRODUCTS

At Parliament Millwork, we take pride in crafting high-quality products made from natural wood. We want to inform our valued customers about the inherent beauty and unique characteristics of wood, which may lead to variations in the appearance and texture of our products.

Wood is a living, naturally variable material, and no two pieces are exactly alike. Variations in grain patterns, color tones, and texture are part of the natural beauty of wood. These differences can result from the type of wood used, its age, and the environmental conditions it experienced during growth.

Knots, mineral streaks, and other natural imperfections can occur in wood. These features are not defects but rather unique elements that add character and individuality to each piece.

Wood products may change in appearance over time due to exposure to light, air, and moisture. Environmental conditions, such as humidity and temperature, can affect the shape and size of wooden products. Wood may expand or contract in response to changes in the surrounding environment.

Please note that the images and renderings of our products on our website and promotional materials may not always capture the exact appearance of the item you receive due to variations in photography lighting and screen settings.

While we strive to provide consistency and quality in our products, these natural wood variations are an integral part of the charm and uniqueness of wood-based items. We hope you embrace and appreciate the individuality of your product as a testament to its natural origin.

If you have any concerns or questions about the specific characteristics of a product, please don't hesitate to contact our designer. We are here to assist you in making an informed and satisfying purchase.

DARK & MATTE MATERIALS

At Parliament Millwork, we offer a range of products with dark and matte surfaces that are designed to provide a sleek and sophisticated aesthetic. While these surfaces offer numerous advantages, we want to inform our valued customers about considerations related to fingerprint and dust visibility on such finishes.

Our products with dark matte surfaces are crafted to be visually stunning, offering a modern and elegant appearance. These finishes are highly sought after for their ability to minimize glare and create a refined atmosphere. It's important to note that matte and dark surfaces can be more susceptible to showing fingerprints and smudges compared to glossy or lighter finishes. This effect is not a result of a defect in the product but is a common characteristic of such surfaces.

To maintain the pristine appearance of your matte and dark surface products, we recommend regular cleaning with a soft, lint-free microfiber cloth. This will help remove fingerprints and smudges, keeping your item looking its best.

When handling products with dark and matte surfaces, it's advisable to do so with clean and dry hands to reduce the likelihood of leaving fingerprints or smudges. Using gentle, non-abrasive cleaning products is also recommended for maintenance.

While we understand that fingerprint visibility can be a concern, the beauty and elegance of dark and matte finishes often outweigh this consideration. We believe you will appreciate the refined aesthetic and overall quality of our products.

If you have any questions or require additional information about the care and maintenance of our products, please don't hesitate to contact our designer. We are here to assist you in making an informed and satisfying purchase.
